Object : Cover Letter for a position in SOFTWARE DEVELOPER
Salary Expectation: $1000 to $1500 net/month

Dear Sir/Madam,

I am writing to you in order to apply for a position in SOFTWARE DEVELOPER. I believe my academic background and my great desire to apply my knowledge and experience into practice makes me an excellent candidate for the position.

I hold a master degree from France in Embedded Systems - Hardware and Software Engineering in 2014, and another master degree in Telecommunication and Computer Science in 2011. I have a good knowledge on both hardware and software technology.

During my academic years, I have learned many useful subjects and have enlarged my understanding and knowledge on the various fields, especially in IT, electronic and telecoms fields which I am interested in the most. In addition to my research on internet during my study, I have done a lot of assignments, projects and many reports with Word and Excel as well as many presentations. That is why I am capable of using Word, Excel, Power Point and internet/email.

Recently, I worked as an IT Lecturer for Kirirom Institute of Technology (KIT). In KIT, I touch the basics and middle level of IT in English including: HTML/CSS/JS, DBMS, MySQL, Android, Java web application - Servlet&JSP. In addition, I leaded the students to do their internship with several project such as: drone programming project, projection mapping project, AI, EDM. Moreover, I did some admin task like: Staff Attendance check list and Transportation check list. That is why I can say that I have a good organizational skills and ability to handle multiple tasks. And in KIT, my colleagues are from different countries like: Indian, Philippine, Japan. I can work effectively with various personalities and cultures.

After coming back from France on 28 June 2015, I started working as a Software Engineer at PATHMAZING Inc Company from July 2015 – October 2015. I worked within a team of Android mobile software development. I have improve my knowledge with Android mobile software development and the basic knowledge of NodeJs for web service. I've mastered my skill in designing, coding, debugging and testing.

Apart from this, I am aware of many different programming languages like Java, JavaSwing, JavaFX, Android, HTML, CSS, MySQL, NodeJs, PHP, etc because during most of my free time I do self study related to IT and any new technology that is necessary for my job.

I am hard working and self-motivated. Evidently, because of hard working and self motivated, I have received the SUMITOMO scholarship in 2008 and the AUF scholarship in 2010 to continue my master degree in France. And, I like working as a team and sharing my knowledge and experiences with others.

I am willing to learn new things that necessary to any tasks, to update my knowledge and experiences for further advancement work in the future. For further information, please see on my enclosed résumé. In the meantime, I would like to take this opportunity to thank you for your time and your kind consideration.

I am looking forward to hearing from you soon with an opportunity to further discuss my knowledge and experiences with you at the interview.

Yours faithfully,

Vicheka PHOR
